Cheongju University; South Korea

B.A. Business Administration | 2004-2008

UNIBE | Finance and Marketing | Dominican Republic

Feedback *from Fjord*

Feedback from Fjord

Cal Hinson - Digital Technology Developer Manager

"Working with Juan on CalHEERs has been a pleasure. He is always cheerful, ready to help and looking for ways to improve. I have seen him progress quickly over the months he has been working on this project, and is becoming one of our most valuable developers.

CalHEERs is an extremely complex project, and he has learned the details of this project very rapidly and has already been able to help train new developers that have joined the project since. His consistently positive attitude and willingness to adapt are important strengths to have on this project, and he has demonstrated both consistently.

I also appreciate his diligence in examining the visual and technical documentation and annotating how these work together, to guide his work. "

Anna Ownes - Program/Project Mgmt Associate Manager

"Juan began working on the CalHEERs project in May, and has been an important part of the team from the start. It was great to see how quickly he got up to speed and was able to start contributing to our work. He was able to jump into a project that was already underway, and help support the development team to keep moving forward under our tight deadlines. This application is very complex, both in the business rules/flow - as well as the development language.

Juan brought his knowledge of React to the project, and has quickly become a key team member with our Fjord family. He has such a positive attitude and has been a great collaborator, despite the tight timelines and stressful nature of the project. He is a team player - always being flexible and willing to travel to Austin when requested, to help support our team. He has shown to me that he wants to give 100% to his work, and takes accountability for its success. It has been a pleasure to work with Juan on CalHEERs - and am looking forward to the future of the project with him on the team! "

Benjamin Leffler - Content Design Associate Manager

"Since joining the CalHEERS project, Juan has been extremely positive and a great communicator. He asks good questions and resolves issues in real time. Juan often points out inconsistencies and shortcomings in my documentation, which has forced me to rethink deliverables to better serve the development team. Juan is particularly helpful when he is on on-site in Austin, as he very collaborative and often helps us work through complex issues before they become defects.

As Juan continues to work with our team, it would be great if he would provide additional insight about how design can better serve development -- how deliverables could be improved, streamlining our process, etc.

Feedback from Fjord

Benjamin Leffler - Cont.

"Juan asks great questions and confirms the design team's intentions before committing it to code. He is great collaborator, and he is quick to comprehend complex business rules and their impacts on the design. As he has become more familiar with the CalHEERS project and our delivery process, Juan has started to provide valuable feedback to help us improve our processes and documentation. I look forward to working with Juan to continue to improve design-dev collaboration, and hope he continues to share his perspective with the team."

Brandy Shigemoto - Senior Visual Designer

"Since joining CalHEERS, Juan has been a great communicator with the design team. On several occasions, he has asked both visual and UX teams to walk him through certain sections of the application to ensure he understood every design intention. This was extremely valuable for both parties to ensure his build met everyone's expectations."

Juan also does a great job catching visual design inconsistencies between screens. His attention to detail has ensured that all states are accounted for and are uniform with the rest of the application

Juan only recently joined the CalHEERS team but has already proven himself a valuable team member. He is eager to learn and doesn't hesitate to ask questions to further his understanding of this complex application. Juan consistently has a positive attitude throughout stressful deadlines and works hard to deliver a quality product."

Juan is always interested in learning about the design process and the different roles that make up our team. In terms of growth, I hope that he continues to learn more about the Fjord process and has the opportunity to contribute to the initial stages of the design phase. Through this experience, I hope Juan will gain the confidence to push UX, content, and visual while poking holes in their work to create an even better product."

Antonia Agliadoro - Interaction Designer

"It's been a real pleasure working with Juan on CalHEERS. Even though he only recently joined the team, his positive energy and collaborative nature have contributed a great deal to the success to the project."

Recently, we began a new scope of work and Juan was very proactive about reaching out to design to understand the designs and clarify questions that he had about the documentation. His efforts to reach out got a lot of questions answered early on and reduced the risk of things coming up in the middle of the development process. Juan has also done a great job of communicating with design when issues do come up during development, helping us to quickly and effectively resolve issues and find solutions. "

Feedback from Fjord

Ivan Avila - QA Lead

"Juan is highly communicative not only with other developers but with designers and QA. As the fjord QA lead, I find this highly commendable especially in a project of this magnitude. Juan's ability to break down communication barriers mitigates misunderstanding between the teams."

Michael Sparks - QA Lead

"Juan has been a pleasure to work with on CalHEERs. He was brought in to the project at a time where deadlines were looming, and had to ramp up on the project very quickly. He was able to get caught up to speed in no time and has been an invaluable asset to our team ever since."

Juan works very well with our Design and QA teams and communicates well during our standups. If QA has any questions on an issue Juan worked on Juan is very responsive and helpful. I look forward to working with him more as we continue work on CalHEERs."

Marcus Davis - Visual Design Associate Manager

"Juan is a fantastic dev: He's easy to work with, offers great direction, and explains his technical needs without being confusing. His demeanor is always positive."
